

RI TRANSPARENCY REPORT 2020

Alphinity Investment Management Limited

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

	Alphinity has been a signatory to the Principles for Responsible for ensuring the long-term sustainability of returns for its investors th opportunities in its investment portfolios. This paper applies prim more limited ability to interact with its investee companies and ex but it is working towards similar objectives as its activities mature some similar matters in a more specific manner. Corporate responsibility	rough the management of environmental, social and goverr arily to Alphinity's Australian Equities operations. Alphinity G ercise influence on those companies at this stage of its deve	nance (ESG) risks ar lobal Equities has a lopment, due to its s			
	Alphinity has always integrated ESG considerations in its investm its success in long-term investing it needs to allocate capital to er creation is largely a result of the effective management of financi according governance practices, including labour practices, healt environmental practices, including the management of natural res Engagement: Alphinity has found the most effective way to align t interaction, including discussion with the company of relevant res Transparency: Alphinity believes transparency is consistent with around its investment activities, within the sensible boundaries of strive toward a reasonable level of transparency, also within the s Human rights: These are fundamental to a just society. Alphinity a will encourage its investee companies to do the same. Alphinity w resulted in the establishment of a Modern Slavery Act. Climate Change: Alphinity acknowledges the findings of the Interg as this needs to be addressed by coordinated actions by all partie	terprises with sustainable business operations and practice: al, physical and human capital so investment opportunities and safety and diversity; social practices including community source scarcity and exposure to climate change risks. The interests of its investors with investee companies is thro- ponsible investment principles, encouraging them to improv- good governance and that it should display an appropriate d commercial sensitivity. Similarly, the companies in which it i ensible boundaries of commercial sensitivity. Jims to promote and respect observance of basic human rig ras a signatory to the PRI engagement with the Australian Pa- povernmental Panel on Climate Change and believes that a g	s. Long-term value should be evaluated engagement; and ugh vigorous e and disclose. legree of transparer nvests should also hts and freedoms a arliament which has lobal challenge suc			

Alphinity incorporates ESG considerations into its investment and risk management processes and regularly reviews the ESG risk within its equity portfolios. The assessment of individual securities as investment opportunities and the consideration of ESG risks and opportunities pertaining to those securities is the responsibility of Alphinity's portfolio managers and analysts. Alphinity will review at least quarterly the ESG attributes of its portfolios with the aim of being aware of where the risks and opportunities are concentrated. The review will include portfolio ESG factor scores using data provided by a recognised ESG research house; estimation of portfolio carbon metrics using data provided by a recognised research house; consideration of social risks through the assessment of exposure to human rights, and safety; specific consideration of climate change transition risk through exposure to fossil fuels of companies operating in carbon-intensive industries; specific consideration of climate change physical risks to investee companies' assets through assessment of the impact of extreme weather events, changing weather patterns and rising sea levels on physical assets and supply chains. Regarding climate change, Alphinity will ensure that an appropriate carbon price is factored into the analysis of companies where relevant. That price is reviewed annually with an eye on changes in the international market price of carbon, extrapolating trends when appropriate.

Alphinity has found that active engagement with a company generally leads to a better understanding of how that company intends to fulfil its obligations as a responsible corporation as well as making the company aware of our expectations as a responsible shareholder. Alphinity engages with investee management on all matters it believes will have a material impact on its long-term sustainable value, and on ESG practices it believes the company should be reviewing. The intent of this dialogue is not to make Alphinity aware of inside information: quite the opposite. Possession of inside information is a significant personal and business risk, and acting on inside information is a crime. The intent is to improve the company's awareness of the various risks and opportunities that will allow it to make better decisions, which will improve social outcomes and benefit shareholders over the medium and long term.

Alphinity votes all proxies and engages with companies in a manner consistent with its Corporate Responsibility Principles, subject to client direction. Proxies are a valuable asset and we have a duty to vote proxies in investee companies to promote good ESG practices. Alphinity engages a proxy adviser to advise on proxy votes but will ultimately make its own decisions. Votes are cast in a manner consistent with our duties and responsibilities to investors. Votes are to be cast in a manner consistent with long-term value creation and good governance. Alphinity will not generally abstain from voting unless is directed to by a client, or it has exited the stock prior to the meeting being held. Where Alphinity intends to vote against a board or management recommendation, Alphinity will engage with the company to inform them of the reasons with the expectation that the issue should not reoccur in the future.

Further detail is on the website about avoiding companies, collaboration and transparency

SG 07.2	For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these
	responsibilities.
resolv Alphin invetm	nent staff have the responsibility of assessing investee companies' ESG issues, communicating with companies about how these will be mitigated/improved, and incorporating the outcome into the financial models that drive the investment process. As a 12-person organisation, does not possess the range of hierarchies described above, all staff staff are intimately involved in the portfolios and implementing responsible t for our clients. The board has a pure governance role, it does not get directly involved in investment activities but endorses and oversees policies
and pr	aures s Sustainable Share Fund has a governance committee containing two highly-qualified external experts in the field of sustainability to help refine,
	a dinterpret the very high-level data provided by ESG/Sustainability service providers.

SG 11.4

Provide a brief description of the main topics your organisation has engaged with public policy-makers or regulators of

Setting expectations around what companies should be providing investors such as:

a) Policy – a stand-alone and/or integrated organisational-wide human rights policy, or policies, that reflects our commitment to respect and support human rights, outlining commitments and accountabilities, and issued by the CEO or Chair of the Board; b) Governance – human rights explicitly included in the entity's governance structures and integrated into decision-making procedures; c) Culture – a culture that supports respect for human rights as core to business values and decisions and commits to meaningful consultation with potentially affected stakeholders; d) Due diligence – processes, as part of organisational operational risk management, that support the identification, assessment, prevention and mitigation of potential material adverse human rights impacts and risks, integrate due diligence findings and tracks effectiveness of due diligence responses; e) Grievance – accessible and safe grievance mechanisms and procedures to allow rights holders to report human rights concerns; f) Remediation - processes to enable the remediation of material adverse human rights impacts companies cause or to which they contribute; and g) Disclosure - a system for monitoring the effectiveness and publicly reporting on the entity's progress on assessing, mitigating and responding to adverse human rights impacts associated with its operations, products and services and business relationships.

And committing to our own action:

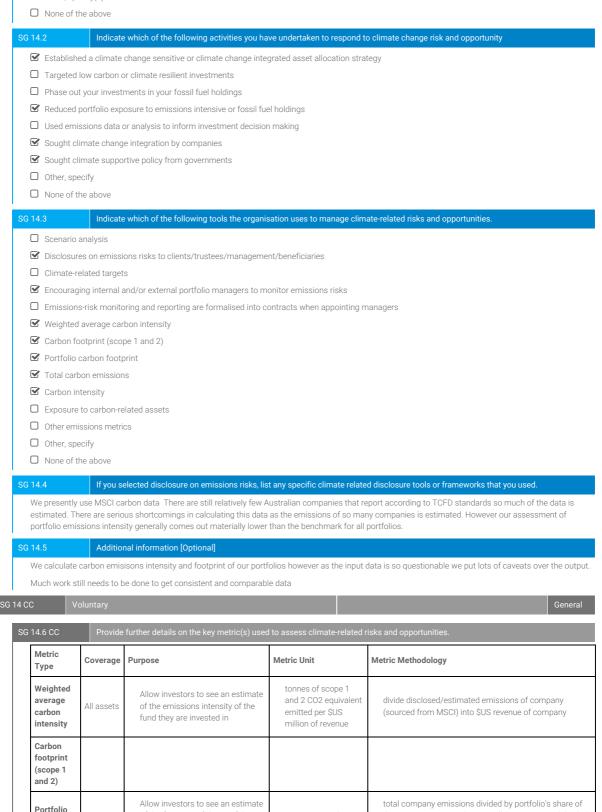

1. Governance – reference human rights frameworks and conventions in our investment policies and promulgate these throughout our management systems to operationalise these policies; 2. Integration – include human rights impacts and risks and opportunities in our ESG assessment and investment decision-making procedures; 3. Stewardship – build human rights risks and opportunities into our active owner and stewardship initiatives (i.e. engagement and voting); 4. Collaboration – share knowledge and participate in collaborative industry initiatives and across stakeholder groups to amplify our message and magnify our impact to this commitment; and 5. Transparency – publicly report on our progress and the effectiveness of our responses.

		balanced portfolio of 35-55 companies with attractive investment fu le' as our approach has proven successful through a number of diff h.		

The Alphinity Sustainable Share Fund has a Compliance Committee which meets at least monthly and includes the Portfolio Managers and two high;yqualified independent sustainability experts. The Committee's role is to rigorously review the investable universe to ensure compliance with the Charter; adjudicate on "grey areas"; refine the Fund's Charter and filters as the SDGs evolve; help identify areas of company engagement; and review the external service providers used.

LEI 10.2	Indicate which methods are part of your process to integrate ESG information into fair value/fundamental analysis.
🗹 Adj	ljustments to forecasted company financials (sales, operating costs, earnings, cash flows)

🗹 Adjustments to valuation-model variables (discount rates, terminal value, perpetuity growth rates)

Valuation multiples

☑ Other adjustments; specify

in some cases, blanket rejection of companies with inadequate controls or risks that are large and/or not being addressed

	LEI 10.4	Describe the methods you have used to adjust the income forecast/valuation tool.				
	The metho	d used depends on the nature of the issue involved.				
		For example, in the case of a potentially stranded asset like a coal mine we would take a pessimistic view of the potential life of the mine and bring forwar clean-up costs.				
		e of a company with adverse social impacts or poor corporate governance we would rather tend to increase the discount rate or adjust our o reflect the increased risk our to which investors are being exposed.				
	In the case	e of a company with poor governance or critical issues that are not being addressed we would tend to avoid exposure altogether				
	LEI 10.5	Describe how you apply sensitivity and /or scenario analysis to security valuations.				
	of potentia	essing key value drivers of a company we arrive at a base case, i.e. what we expect to happen, but then typically flex those drivers through a range al outcomes in order to see what might happen should things not go according to our expectations. This is an important factor in being aware of d go wrong (or right) that changes our williness to accept risk.

Conducted by	 Climate Change Health and Safety Water risks Labour practices and supply chain management Individual / Internal To determine whether a company operating in horticulture across Australia, China and Morocco is making adequate preparation for future climate-related water scarcity, and treating its seasonal workers appropriately. We worked with our external sustainability experts to determine the scope and nature of the engagement, gaining insights of potential issues from their expertise in climate change and utilising ESG data provider assessment of issues impacting the company We had several meetings with management and the Chair, conducted site visits and undertook discussions with experts. We concluded that the company is thinking deeply about its climate exposure and has mitigated its risk as much as possible throug protected cropping, geographic diversification, micro-irrigation and significant investment in on-site water storage. In addition we engaged on issues around the use of seasonal labourers in fruit picking operations, particularly those from the Pacific Islands and these hired through labour hire organisations, some of which have poor or exploitative practices used on vulnerable people. We were encouraged that the company seems to have high standards when working with labour organisation and zero tolerance for poor behaviour. As a result, this company has become employer of choice among fruit pickers, many of whom return season after season.
Conducted by Objectives	 Climate Change Health and Safety Water risks Labour practices and supply chain management Individual / Internal To determine whether a company operating in horticulture across Australia, China and Morocco is making adequate preparation for future climate-related water scarcity, and treating its seasonal workers appropriately. We worked with our external sustainability experts to determine the scope and nature of the engagement, gaining insights of potential issues from their expertise in climate change and utilising ESG data provider assessment of issues impacting the company We had several meetings with management and the Chair, conducted site visits and undertook discussions with experts. We concluded that the company is thinking deeply about its climate exposure and has mitgated its risk as much as possible throug protected cropping, geographic diversification, micro-irrigation and significant investment in on-site water storage. In addition we engaged on issues around the use of seasonal labourers in fruit picking operations, particularly those from the Pacific Islands and those hired through labour hire organisations, some of which have poor or exploitative practices used on vulnerable people. We were encouraged that the company seems to have high standards when working with labour organisation and zero tolerance for poor behaviour. As a result, this company has become employer of choice among fruit pickers, many of whom return season after season.

We worked with our external sustainability experts to determine the scope and nature of the engagement, gaining insights of potential issues from their expertise in climate change and utilising ESG data provider assessment of issues impacting the company We had several meetings with management and the Chair, conducted site visits and undertook discussions with experts. We concluded that the company is thinking deeply about its climate exposure and has mitigated its risk as much as possible throug protected cropping, geographic diversification, micro-irrigation and significant investment in on-site water storage. In addition we engaged on issues around the use of seasonal labourers in fruit picking operations, particularly those from the Pacific Islands and those hired through labour hire organisations, some of which have poor or exploitative practices used on vulnerable people. We were encouraged that the company seems to have high standards when working with labour organisatic and zero tolerance for poor behaviour. As a result, this company has become employer of choice among fruit pickers, many of whom return season after season. We also encouraged the company to disclose some of the good things it was doing in a sustainability report. This has now beer produced Disclosure / report published

	Objectives	To arrive at a better understanding of a company's dealings with indigenous land owners when considering mining operations, particularly litigation
	Scope and Process	Over a series of engagements we met with the company's CEO and legal counsel to understand the way it deals with various groups of indigenous people who have or claim native title over areas in which the company has resource rights. The company its founder has always portrayed itself as a friend of the indigenous and has significant employment programs targetting local groups in order to drress some of the inequality they experience compared to broader society. It is testing aspects of its land ac agreements in the High Court in order to legally establish what it can and can't do
	Outcomes	Increased understanding / information
S A	dd Example 3	
	ESG Topic	Climate Change
	Conducted by	Individual / Internal
	Objectives	Engaged with a gas company around CO2 emissions, fugitive emissions and the risk of stranded assets given its capital expenditure plans
	Oceano cond	Over several years we have had meetings with the Chair, directors with environmnetal responsibilities and the sustainability ex at the company. We tested them on their thinking around long-term gas demand, considering many of the projects in which the have invested have multi-decade lives and milti-year payback periods. We tested them about measuring fugitive emissions and pushed them on their plans to limit emissions.
	Scope and Process	We examined the company's view that the demand for gas will be sustained for some decades and that, in the short term, repl coal in Japan and China with gas is an environmental positive, and that in the long term demand will be sustained in use cases well catered for by electricity/batteries, such as haulage, air travel and shipping. being positioned at the low end of the produc cost curve will provide some protection against stranding provided demand does not disappear completely.
		In the end however we concludd that the time to get a return on the capital they need to deploy on gas field expansion is unlike be paid back before gas becomes a less viable fuel for generating electricity. We subsequently divested the position.
	Outcomes	Divestment

	ESG Topic	 Executive Remuneration Company leadership issues
	Conducted by	Individual/Internal
	Objectives	Assess the appropriateness of what at first seemed to be a fairly convoluted and lucrative remuneration structure
	Scope and Process	A property development company disclosed what appeared to be extreme outcomes for management remuneration last yea which caused concern in the investment community. We engaged extensively with directors to understand the structure and the outcomes were arrived at. The company had performed extremely well and much of the apparent pay was a result of sha having appreciated several times over the period of time between issuance some years ago and when they vested. Actual pay the current year was quite moderate (in a relative sense) and we supported the remuneration report
	Outcomes	Voting
Z A	dd Example 2	
	ESG Topic	 Climate Change Political spending / lobbying
	Conducted by	Individual/Internal
	Objectives	Gas exploration company was not, in our view, adequately disclosing future emissions projections so the market was unabile assess whether or not it was consistent with Paris goals. It was also a member of an industry body that appeared to be work against the interests of controlling emissions.
	Scope and Process	We engaged with the company in advance of the shareholder meeting to get its view on the resolutions. When it transpired it not, in our view, adequately respond to them we voted in favour of two of the resolutions (although not the enabling resolutio order to send a message to the board that it should be more proactive. We will keep engaging over the next year to encourage compliance and would consider voting in favour of the enabling resolution in the future if adequate action is not seen.
